ENTERPRISE CAPABILITY / 01

Capability Statement

Grid Platforms Limited is a Nigerian technology company developing a family of business-management platforms and public-opinion tools for people and organisations.

Grid Platforms Limited

Business Management Platform Suite

Strategically supported by Zamkah Technologies Limited

Core capability themes

01

Structured operational records

Bring recurring information into a clearer product workflow, with an understandable record of the work.

02

Roles and responsibilities

Design access and actions around the people responsible for administration, oversight and follow-up.

03

Reporting and visibility

Make useful operational information easier to review across the relevant teams and locations.

04

Follow-up and coordination

Give renewals, handovers, notifications and unresolved tasks a clearer place in everyday work.

Who the portfolio is designed around

Companies and multi-site businesses; property and facility operators; petroleum marketers and fleet operators; schools and healthcare organisations; hospitality and market organisations; associations, public institutions and research teams. These are intended audiences, not claims of active contracts.

Explore our enterprise approach

ENTERPRISE CAPABILITY / 02

The product family, at a glance.

Fourteen focused products across six operating sectors: two Live, four In Development and eight Planned. Confirm current scope online.

01

Property & Facility

Better-managed spaces. Clearer responsibilities.

- LeaseGrid — Live
- FacilityGrid — Planned
- MarketGrid — Planned
- PowerGrid — Planned

02

Energy & Mobility

Visibility across fuel, vehicles and movement.

- FuelGrid — In Development
- FleetGrid — Planned

03

Institutional Operations

Bring everyday institutional records together.

- SchoolGrid — Live
- HealthGrid — In Development
- StaffGrid — Planned
- InventoryGrid — Planned

04

Commercial Services

Make every booking and service easier to manage.

- HotelGrid — Planned
- EventGrid — Planned

05

Media & Information

A dedicated platform for news and information.

- NewsGrid — In Development

06

Public Opinion & Research

Structured questions. Opinion in context.

- PollGrid — In Development

Live products may use controlled onboarding or phased feature activation. Development directions are not a promise of commercial availability or a portfolio-wide feature list.

ENTERPRISE CAPABILITY / 03

A practical route from enquiry to scope.

Begin with an operational need and assess the relevant product before agreeing implementation commitments.

Engagement sequence

1. Discovery
2. Product / operational fit
3. Demonstration
4. Scope and implementation planning
5. Onboarding / data preparation
6. User training
7. Go-live
8. Support and review

Demonstrations, onboarding, training and go-live depend on readiness and agreed scope. Timing and commercial terms are discussed for your organisation.

Trust principles

Privacy by design, least privilege, role-based access, auditability and responsible handling guide development. Education and healthcare records require particular care. Payment-related features should use licensed or regulated partners where applicable.
